Supervisor's OnBoarding Checklist

Helping a new employee get off to a good start makes a difference in the employee's job effectiveness and overall welcome feeling. The checklist below serves as a guideline and best practice for supervisors and managers to help orient new employees and to fully engage them.

Completing the checklist at the intervals noted below (Pre-Arrival, First Day, First Week, First Month, and 3 Month) will assist supervisors in helping new employees to become successful and effective. To enhance the communication efforts, it is important to involve the new employee by asking for feedback often. Asking questions of the new employee can help determine the level of understanding of policies and procedures.

Always address performance issues when they arise to avoid future issues that can be more detrimental to the new employee and the effectiveness of the department.
